Sales Analysis
Executive Dashboard

Presented by:

Raviraj Singh Chundawat

Objective

The objective of creating this Excel sales dashboard is to analyze sales performance, item popularity, customer preferences, and time-based trends to generate actionable insights that help optimize sales and customer experience.

Dataset overview:

The dataset contains McDonald's item-level sales transactions, capturing menu items purchased in each order along with order date and time.

KEY DATA POINTS

- ✓ Order Date & Time
- ✓ Menu Item Name
- ✓ Item Category
- ✓ Price & Revenue

ENABLES ANALYSIS OF

- Revenue Performance
- Basket Size & Combos
- Time-based Demand
- Category Popularity

Dashboard Overview

- Displays key sales KPIs including total revenue, total orders, and average items per order
- Visualizes revenue distribution across menu categories and top-selling items
- Shows order volume patterns across hours and days of the week
- Compares weekday and weekend sales behavior
- Allows filtering of all visuals by month, day type, day, and hour
- Enables interactive exploration of sales performance and customer ordering patterns

Key Insights :

WsCube Tech®
Upskilling Bharat

Overall Performance:

Total Revenue: $61.6K
Total Orders: 5,370
Avg Items/Order: 2.28

*Customers typically purchase **2–3 items per order**, indicating combo-style buying.*

Product Insights

Most ordered: Side Salad
Top items dominated by **burgers and sides**

Strong add-on behavior with main meals.

Category Insights

Burgers generate the highest revenue (~$21.6K)
Chicken and Pasta follow
Low performers: Wraps, Shakes, Salad

***Burgers** are the core revenue driver.*

Time Insights

Peak orders: 12–2 PM
Secondary peak: 5–7 PM
Weekdays: 72% **of orders**
Weekends: 28%

***Lunch** is the primary demand window.*
McDonald's acts mainly as a weekday convenience meal option.

Recommendations

Menu Strategy

Expand and promote high-performing burger variants
Create burger-focused meal bundles

Upselling & Combos

Bundle sides with main items (meal deals)
Suggest add-ons at ordering points

Time-Based Promotions

Lunch combo offers (12–2 PM)
Early-evening deals (5–7 PM)

Weekday Demand Focus

Target office and student segments
Introduce weekday meal plans or loyalty offers

Low-Performing Categories

Improve the visibility and appeal of low-performing categories (wraps, shakes, salads) through targeted promotions, bundling, and positioning as add-ons or specialty item.

Strategic Goal

Increase average order value and revenue by leveraging burger demand, side add-ons, and peak weekday lunch traffic.
